PERIMETER LIGHTING

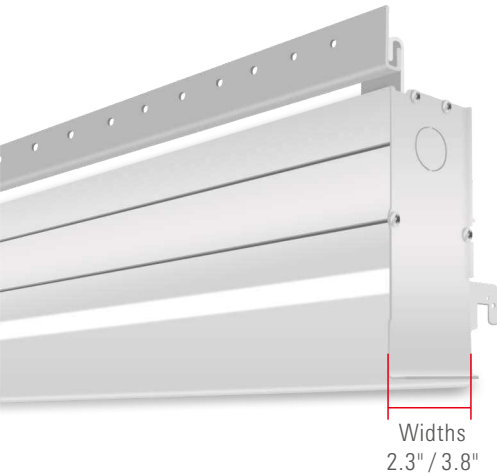

DEFINE YOUR SPACE

OKT LED Perimeter Lighting subtly outlines architectural perimeters, adding depth and dimension through elegant accent illumination. By creating a glowing transition where walls meet ceilings, it introduces visual contrast between the room's edges and center.

EXPLORE THE BENEFITS

OKT Perimeter Lighting is truly contractor friendly, featuring tailored lengths or adjustable illuminated telescoping, fully illuminated and factory built 90° corners, plus an all-in-one box shipping method to streamline installation...

ARCHITECTURAL DEFINITION

A perimeter luminaire designed for a seamless transition between wall and ceiling, delivering a uniform wash of light ideal for dramatic, architectural lighting effects.

A photograph of a modern interior space. A large, white, curved wall dominates the left side of the frame. The ceiling is a white grid with recessed lighting fixtures. A long, narrow, illuminated light fixture is visible on the right side of the ceiling. The overall atmosphere is clean and minimalist.

VISUAL EXPANSION

The even illumination along the walls created by perimeter lighting can visually expand the perceived size of a space, making it feel more open and spacious.

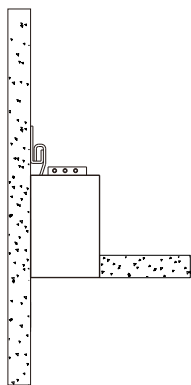

FLEXIBLE INSTALLATION VERSATILITY AT ITS FINEST

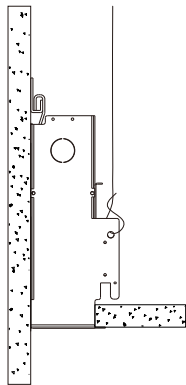

Featuring simplified installation options, the luminaire is available in threaded-rod or wall-mount configurations, ensuring a perfect fit—even in drywall or T-grid ceiling applications.
